

COMMUNICATING WITH HONEYBEES

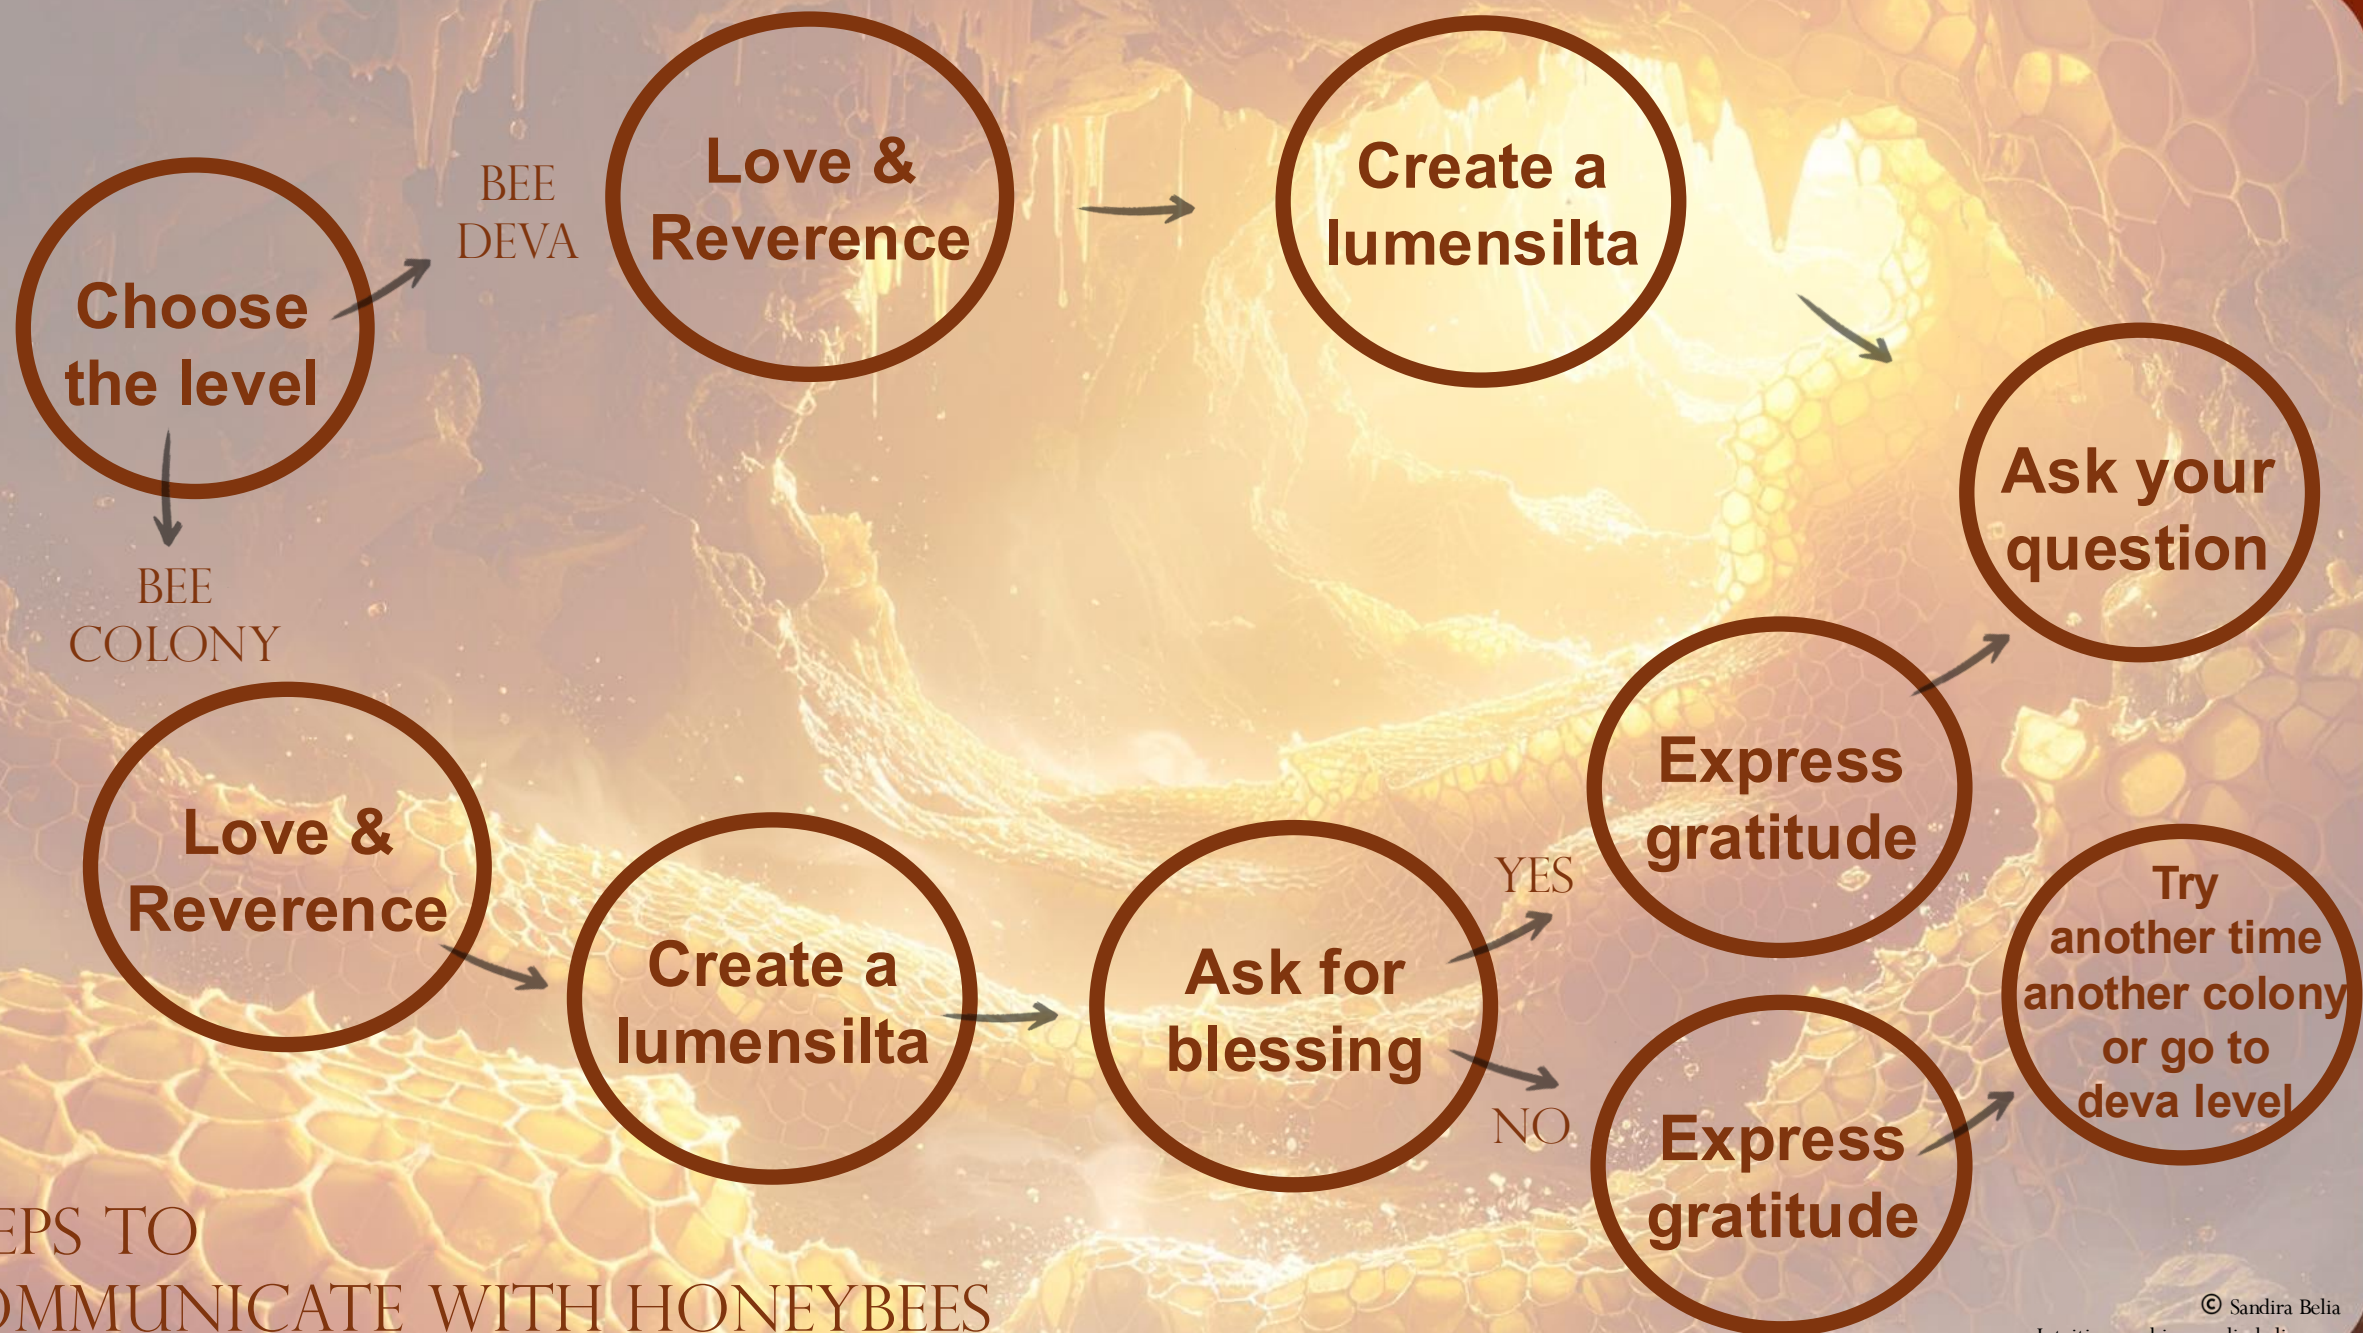

Part 2 - In-Field Communication

THE VITAL BODY (OR ETHERIC BODY)

RECOMMENDATIONS FOR IN-FIELD COMMUNICATION WITH A BEE COLONY

- **Overall principle: slow down.**
- **Slow down even more if the colony doesn't know you.**
- **When you are about 10 metres from the hive, pause.**
- **Try to perceive, in your mind's eye, the aura layers surrounding the hive.**
- **Make your first connection from this place.**
- **You may bring your hands in front of you as open receptors.**
- **Connect with the hive from heart to heart.**
- **Ask for the hive's blessing to come closer, if you wish.**
- **A "yes" answer may be perceived as a thinning of the aura layer, a door opening, an energetic pull, or an opening in your heart.**
- **Respect the answer if it is "no."**
- **If the answer is "yes," walk closer to the hive, approaching from the side or the back.**
- **Imagine or experience your aura and the hive's aura meeting. Feel the sublayers overlapping.**
- **Find the right place to sit.**
- **You may touch the physical body of the hive if it feels appropriate.**
- **Continue with the communication process.**

STEPS TO
COMMUNICATE WITH HONEYBEES
